

BUILDING INSPECTORS

Two building inspections are required for participation in the Chapter 353 tax abatement program.

- A preliminary inspection covering the proposed improvements must be submitted with your application.
- A second inspection covering the completed improvements must be submitted when seeking final approval of the project.

These inspections are performed at the property owner's expense and must be performed by a certified building inspector. Fees will vary depending on the nature and scope of the proposed improvements. You are free to seek estimates from multiple inspectors before proceeding.

These program participation inspections are in addition to any inspections or approvals that may be required by city building codes. Before proceeding with your project, you should check with the city to see if any building permits or construction permits are required.

You may choose any certified building inspector. However, to assist you in this process, the Harrisonville Square Neighborhood Redevelopment Corporation has contacted the following inspectors to make them aware of the program:

Mar-Tech Inspections

Mark Witt

816-726-6814

McGuire Inspections

Kelly McGuire

660-679-8251

This list of inspectors may be modified from time to time.
